14 Somalia	0.1	↗	11	1	↗	n/a	43%	68%	<div><div></div></div> 33%
15 Zimbabwe	0.1	↘	18	1	↗	3%	100%	0%	<div><div></div></div> 38%

Positive Testing Rate: This is the daily positive rate, given as a rolling 7-day average. According WHO, a positive rate of less than 5% is one indicator that the epidemic is under control in a country. Vaccination campaigns disrupted: This percentage has been determined by calculating the ratio of total number of postponed or cancelled campaigns and total vaccination campaigns. Food Market Prices: This information has been determined by calculating the ratio of the number of commodities in alert, stress or crisis and the total number of commodities.

Sources: WHO (Covid-19 cases and deaths); Our World in Data (Covid-19 testing, Positive testing rate); OCHA (Funding); WFP (Food Prices)
